

The drawing consists of two views of a hydraulic valve assembly:

- View 5 (Side View):** A circular cross-section of the valve body. It features a central circular opening surrounded by concentric rings, indicating internal components like a spool or piston. The view is labeled with a circled '5'.
- View 6 (Top View):** A rectangular plan view of the valve body. It shows two circular ports on the left side, each with a center-to-center distance of 2.56 units from the left edge. The distance between the two ports is 3.00 units. The total width of the body is 2.50 units. The text "SUN hydraulics" and "ECV/S3" are printed on the right side, along with a date code "<DATE CODE>". A dimension of .38 units is shown for the distance from the center of each port to the right edge. A dimension of .44 units is shown for the distance from the center of the right port to the right edge. A dimension of .38 units is shown for the distance from the center of the left port to the left edge. The view is labeled with a circled '6'.

Technical drawing of a rectangular plate with a circular hole. The plate has a width of 3.00 and a height of 1.25. The hole has a diameter of 1.56. The hole is centered horizontally and vertically. The drawing includes dimension lines and a scale bar.
