

Technical drawing of a rectangular plate with a central hole. The plate has a width of 2.25 and a height of 4.25. The hole has an outer diameter of 1.13 and an inner diameter of 3.44. A dimension line indicates a distance of 0 from the bottom edge to the center of the hole.

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
