

Technical drawing of a rectangular plate with a central circular hole. The plate has a width of 4.25 and a height of 2.25. The hole has an outer diameter of 2.13 and an inner diameter of 1.13. A small square with the number 5 is located at the bottom right corner.

Technical drawing of a rectangular plate with a central hole. The plate has a width of 4.25 and a height of 2.25. The hole has an outer diameter of 3.44 and an inner diameter of 1.13. A dimension line indicates a distance of 0 from the bottom-left corner to the center of the hole. A small box containing the number 7 is located at the bottom left.

A diagram of a square with two circles inside. The circles are positioned vertically in the center of the square. The top circle is labeled '0' and the bottom circle is labeled '8'.

1. Important: Carefully consider the maximum system pressure. The pressure rating of the manifold is dependent on the manifold material, with the port type/size a secondary consideration. Manifolds constructed of aluminum are not rated for pressures higher than 3000 psi (210 bar), regardless of the port type/size specified.
2. This drawing is for reference only. It is generated by an automated process and does not fall under Sun's document control process.
